ABOUT ME

I'm Fábio Guieiro, a senior software developer with over 5 years of experience and a technical lead with extensive expertise in front end technologies. Throughout my career, I have worked at companies such as Banco Inter, Queima Diária, Teknisa, and Casa do Saber, gaining experience in React.js, Next.js, TypeScript, Node.js, React Native, Smart TV development, among others. I've had the opportunity to work at companies of various sizes, from startups to multinationals, and in different sectors, such as foodtech, fintech, e-commerce, edtech, and streaming platforms.

PROFICIENCY STACKS

React	4 years	CSS	5 years
React Native	3 years	javascript	5 years
Vue.js	1 year	typescript	4 years
Node.js	2 years	Python	1 year
HTML	5 years	Next.js	3 years
Redux	3 years	SQL	3 years

STRENGTHS & SKILLS

- Front-End Development Expertise;
- Smart TV Application Development;
- Technical Leadership;
- Cross-Platform Development;
- Performance Optimization;
- Innovative Problem Solving.

WORK EXPERIENCE

Senior Front end developer
Casa do Saber
A platform for free courses to support your continuous professional and personal development.

📅 January 2024 – Current   📍 São Paulo, Brazil   Business area: Education and technology

Smart TV application:
- Main goal: Develop a state-of-the-art streaming system for online classes, including the company's first Smart TV application.
- Details and responsibilities: Lead the front end development, design, and implementation of the streaming platform. Collaborated closely with cross-functional teams to ensure a seamless user experience across web and Smart TV interfaces. Oversaw the integration of UI components, managed version control, and ensured code quality through best practices.
- Outcome: Successfully launched Casa do Saber's first Smart TV application, marking a significant milestone in the company's digital offerings. The project is ongoing, with further enhancements and optimizations planned to expand its impact on the online education market.
- Technologies: React, React Native, TypeScript, Styled Components, GitHub, Tyzen, WebOS.

Tech Lead / Senior Fullstack Developer
Btix
An innovative company specializing in ticket sales systems powered by NFT technology, offering a comprehensive platform for event management, ticketing, discount coupons, and promoter management.

📅 April 2023 – January 2024   📍 Rio de Janeiro, Brazil,   Business area: Ticketing and Event Management

Ticket Sales System with NFT Technology
- Main goal: Develop and implement a cutting-edge ticket sales system utilizing NFT technology to enhance security and traceability in event ticketing.
- Details and responsibilities: Led the front end development of the NFT ticketing platform, ensuring seamless integration with backend systems and maintaining high performance across various devices. Worked closely with stakeholders to define technical requirements, optimized user interface design, and implemented scalable solutions to meet the demands of large-scale events.
- Outcome: Successfully delivered the initial production version of the NFT ticketing platform, laying the foundation for future enhancements and widespread adoption in the event industry.
- Technologies: React, TypeScript, Node.js, Next.js, Mantine UI, yup, GitHub.

Event/Ticket/Discount Coupon/Promoter Management System
- Main goal: Create a comprehensive management system for events, tickets, discount coupons, and promoters, aimed at streamlining operations and enhancing user experience.
- Details and responsibilities: Oversaw the front end architecture and implementation of the management system, ensuring robust functionality and user-friendly design. Played a key role in improving team synergy and applying best practices such as Git Flow to ensure high-quality code and efficient project delivery.
- Outcome: Delivered a feature-rich management system that improved operational efficiency and provided users with a seamless experience, positioning BTIX as a leader in the event management industry.
- Technologies: TypeScript,Node.js, Material UI, React Native, Node.js, MongoDB, GitHub.

Mid-level Frontend Developer

Inter

Inter is a leading digital bank in Brazil, providing a range of financial services including banking, investments, and insurance through innovative digital platforms.

📅 May 2022 – April 2023   📍 Belo Horizonte - Brazil   Business area: Financial Services and Technology

Corporate Account Opening System

- Main goal: Develop a robust system for opening and managing corporate accounts, aimed at streamlining the account setup process and improving overall efficiency.
- Details and responsibilities: Led the front end development of the corporate account opening system, focusing on creating an intuitive user interface and integrating with backend services. Collaborated with design and backend teams to ensure seamless user experiences and adherence to regulatory requirements.
- Outcome:Contributed to a 100% increase in the number of corporate accounts opened during the period, significantly enhancing the bank's corporate onboarding process.
- Technologies: React, Styled Components, TypeScript, GitLab, New Relic, Jest, AWS.
