Senior Frontend / Fullstack Engineer

fabioGUIEIRO@gmail.com | +55 (31) 99247-2727 | linkedin.com/in/fabioGUIEIRO | github.com/fabioGUIEIRO
Belo Horizonte, Brazil · Open to Remote Roles (US / Europe)

PROFESSIONAL SUMMARY

Senior Frontend and Fullstack Engineer with 7+ years shipping consumer-facing products at scale. As sole frontend engineer at Great Wolf Lodges, architected a Season Pass system generating \$500K+ in estimated revenue and a Voucher Platform issuing 500,000+ vouchers across 22 US and Canadian locations. At PayPal/Venmo, contributed to merchant checkout products touching 95M+ active accounts during a period of 50%+ YoY growth in Pay with Venmo volume. Specialist in React, TypeScript, and GraphQL across fintech, hospitality, and streaming. Experienced in AI-assisted development workflows and remote async environments. Bilingual in English and Portuguese. Available immediately for senior remote roles in the US or Europe.

TECHNICAL SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · React Native · Vue.js · Redux · Styled Components · Tailwind CSS · Mantine UI · Material UI · Yup · Tizen (Samsung Smart TV) · WebOS (LG Smart TV)

Backend & APIs: Node.js · GraphQL · Apollo Client · REST APIs · Express.js · MongoDB · SQL

Testing & Quality: Jest · React Testing Library · Playwright (E2E)

Cloud, DevOps & Tools: AWS (S3, Lambda) · Azure DevOps · GitHub Actions · GitLab CI/CD · Git · New Relic · Figma

AI Dev Tools: GitHub Copilot · Claude · ChatGPT · Cursor

Methodologies: Agile · Scrum · Git Flow · Technical Leadership · Code Review · Cross-functional Collaboration

WORK EXPERIENCE

Senior Frontend Developer

Great Wolf Lodges · September 2025 – Present · Remote — Chicago, US

Leading North American water park resort company · 23 lodges across the US and Canada · Hospitality and Entertainment

- Sole frontend engineer on a rapid-experimentation team building features for a booking engine that drives \$300M+ in annual room revenue — responsible for end-to-end delivery from ideation to biweekly demos attended by the full technology organization.
- Architected and shipped a 7-screen Season Pass flow from zero to production in ~3 months — covering calendar selection, tier offers (weekday vs. unlimited), checkout, confirmation, pass redemption, and reservation management. Launched as a 4-lodge pilot generating \$94,819 in its first 6 weeks, then expanded company-wide to 22 US and Canadian locations — driving 5,000+ passes sold (at publicly listed prices of \$90–\$300/pass) and an estimated \$500K+ in direct revenue.
- Designed and delivered a Voucher Promotion System from zero to production in ~2 weeks as the sole frontend developer — enabling marketing teams to distribute free-admission vouchers at scale. The system facilitated the issuance of over 500,000 vouchers across the lodge network, becoming a primary channel for customer acquisition and retention campaigns.
- Optimized Core Web Vitals (LCP, CLS, FCP) and bundle performance through lazy loading and memoization; authored unit (Jest + RTL) and E2E (Playwright) test coverage for critical booking flows; leveraged AI-assisted tools (GitHub Copilot, Claude) to maintain velocity across fast-paced, low-spec cycles — proactively driving requirements clarification and owning frontend deliverables end-to-end.

Stack: React, Redux, JavaScript, Styled Components, Yup, Git, Azure DevOps

Senior Fullstack Developer

PayPal / Venmo · November 2024 – September 2025 · Remote — Los Angeles, US

Peer-to-peer and merchant payment platform · Financial Services

- Contributed to frontend and backend development of Venmo's merchant checkout products — including the "Pay with Venmo" web integration embedded by merchants in their checkout flows — applying advanced TypeScript patterns (generics, discriminated unions, utility types), Apollo Client for GraphQL query caching and optimistic updates, and strict security practices (XSS prevention, input sanitization, secure cross-origin communication) in a high-compliance fintech environment with 95M+ active US accounts.
- Shipped new payment method integrations and checkout UX improvements as part of a 5–7 person fullstack squad processing \$300B+ in annual payment volume, during a period of accelerated growth: "Pay with Venmo" transaction volume surged 50%+ YoY in Q1 2025, merchants accepting Venmo grew 50%+ YoY, and businesses enabling the integration reported a 17% average improvement in checkout completion rates.

Stack: React, Node.js, TypeScript, GraphQL, Apollo Client, GitHub

Senior Frontend Developer

Casa do Saber · January 2024 – August 2024 · São Paulo, Brazil

Online learning platform · Education Technology · 2M+ students · 300+ courses across 9 knowledge areas

- Led frontend development and launched the company's first native Smart TV applications for WebOS (LG) and Tizen (Samsung) — bringing dedicated TV streaming for the first time to a platform with 2M+ students and 300+ courses, overseeing UI integration and code quality across web and Smart TV interfaces.

Stack: React, React Native, TypeScript, Styled Components, GitHub, Tizen, WebOS

Tech Lead / Senior Fullstack Developer

Btix · April 2023 – January 2024 · Remote — Rio de Janeiro, Brazil

NFT-powered event management and ticketing platform · Ticketing and Event Management

Project 1: NFT Ticket Sales System

- Led frontend development of an NFT-based ticketing platform with blockchain backend integration, enhancing security and traceability. Delivered the initial production version on time.

Stack: React, Next.js, TypeScript, Node.js, Mantine UI, Yup, GitHub

Project 2: Event & Promoter Management System

- Oversaw frontend architecture and implementation of a management system for events, tickets, discount coupons, and promoters. Applied Git Flow and best practices, improving delivery efficiency.

Stack: TypeScript, Node.js, Material UI, React Native, MongoDB, GitHub

Mid-Level Frontend Developer

Banco Inter · May 2022 – April 2023 · Belo Horizonte, Brazil

Leading Brazilian digital bank — banking, investments, and insurance · Financial Services

- Led frontend development of a corporate account opening platform on a 4-engineer team — integrating with Banco Central do Brasil (BCB) for regulatory compliance and a facial recognition system for KYC identity verification, on a platform with 25M+ clients and R\$578B in annual transaction volume.
- Contributed to a 100% increase in corporate accounts opened during the period, significantly accelerating Inter's PJ onboarding throughput during its peak growth phase — a vertical that scaled to 2M+ business accounts in subsequent years.

Stack: React, Styled Components, TypeScript, GitLab, New Relic, Jest, AWS

Mid-Level Frontend Developer

Queima Diária · March 2021 – May 2022 · Belo Horizonte, Brazil

Online fitness and wellness streaming platform · Streaming and Wellness

- Developed a Streaming System and Video Casting System for Smart TVs (Tizen, WebOS) using React and React Native. Achieved a 20% increase in customer engagement and 15% expansion of app compatibility.

Stack: React, React Native, JavaScript, CSS, Styled Components, TypeScript, Redux

Junior Frontend Developer

Editora Forum · September 2020 – February 2021 · Belo Horizonte, Brazil

- Developed the company's first B2C e-commerce platform from scratch, integrating secure payment gateways and enabling product diversification beyond catalog sales.

Stack: React, Next.js, Tailwind CSS, Node.js, AWS (S3), JavaScript, TypeScript, Redux

Junior Frontend Developer

Teknisa · September 2019 – September 2020 · Belo Horizonte, Brazil

- Main frontend developer for an AI-powered object recognition system, building a responsive interface for advanced ML capabilities in close collaboration with AI/ML engineers.

Stack: JavaScript, HTML, CSS, Vue.js, React

EDUCATION

Bachelor's Degree in Information Systems

Federal University of Ouro Preto · October 2013 – January 2019 · Ouro Preto, Brazil
